GREEN:

Three (3) 6-1/2" squares
One (1) 1-1/2" x 10" strip

NEUTRAL:

Ten (10) 2-1/2" squares
One (1) 6-1/2" square

Make the Stem Piece first:

Cut the neutral 6-1/2" square on the diagonal, so it will be divided into two triangles.

On the bias edge of one of the triangles, sew a green strip, centering the triangle on the length of the strip (the strip will extend about 1/4" above and below the triangle).

Press the seam allowance to the green strip.

Add the remaining triangle piece to the other side of the green strip and press, again pressing the seam allowance to the green. Using your ruler and rotary cutter, square up the block to 6-1/2" and trim away excess from stems.

Using a pencil, draw a diagonal line on one of the 2-1/2" squares. Sew the square to one end of your stem block. Trim excess and press into place.

Next, prepare the leaf pieces:

In the same way you added the square to the bottom of the stem block, add squares to three of the four corners of each of the 6-1/2" green squares. Trim and press into place.

Almost done...

Lay out three "leaf" blocks and a stem block following the diagram. Sew these together, and press.

Viola! You should now have a 12-1/2" Shamrock Block!
